

Allied Environmental Solutions, Inc. wins order for the supply of two coal-fired boiler pulse jet fabric filter systems

Allied Environmental Solutions, Inc., formerly Lurgi Lentjes North America, Inc., was awarded a contract in excess of US\$4 million for the engineering and supply of two pulse-jet fabric filter systems with an option for future addition of CFB scrubbers.

The client is a leading producer of coated papers in North America. The fabric filters will be installed on the coal-fired power boilers at the client's mill in order to improve the environmental performance of their manufacturing operations.

The fabric filters are being designed for the possible future addition of Allied's state-of-the-art all dry Circulating Fluid Bed (CFB) scrubber technology.
